

Log of Borehole: Dual Monitoring

Your Company

Your Company Information

Project No.: Environmental Examples
Project: Port Sidney Oil Terminal
X Coordinate: 815 m
Y Coordinate: 322 m
Status:

Elevation: 100.98
Total Depth: 19
Project Manager: M. Fraser

Depth (m)	Elevation (masl)	% Recovery	Soil Sample ID	Type	Symbol	Graphic	SUBSURFACE PROFILE		Well Diagram
							Material Description		
0.0	101.0						Ground Surface		
0.0	0.0								
1.0	99.0	40	1	Auger			Sand and gravel fill, some organic debris.		
2.0	2.0						Moist, brown to grey sandy silt with embedded gravel.		
3.0		30	2	SS					
4.0									
5.0	96.0						Medium to fine sand, occasional clay lenses. Strong hydrocarbon odour.		
6.0	5.0	75	3	SS					
7.0									
8.0		60	4	SS					
9.0									
10.0	91.1						Mottled brown and grey silty clay. Some sandy lenses.		
11.0	9.8	55	5	SS					
12.0									
13.0		80	6	SS					
14.0	87.0						Compact, coarse to medium sand. Shell fragments.		
15.0	14.0								
16.0		45	7	SS					
17.0									
18.0									
19.0	82.0								
19.0	19.0								

Drilled By: ABC Drilling Company
Drill Method: H/S Auger
Drill Date: 1899-12-30

Hole Size: 3.5"
Datum: Local
Sheet: 1 of 1
